

HALIBUT CATCH AND FISHING EFFORT OF THE NORTH AMERICAN
HALIBUT FLEET IN 1966 FOR MAJOR STATISTICAL AREAS OF
THE GULF OF ALASKA

(Reference: Doc. 923, item XIV(3)(b), p. 219,
1966 Annual Meeting Proceedings)

INPFC Major Statistical Areas	IPHC Groupings of 60-mile Statistical Areas*	Landed Catch in Thousands of Pounds	Fishing Effort in Hundreds of Standard Units
Vancouver	040 - 080	1,261	136
Charlotte	090 - 130	10,005	981
Southeastern	140 - 180	12,259	1,341
Yakutat	180 - 230	7,301	680
Kodiak	240 - 280	18,593	1,634
Chirikof	290 - 310	8,576	743
Shumagin	320 - 370	3,020	311
Atka	380 - 410	26	3
Bowers	420+	48	5

* The major subdivisions of the Northeastern Pacific Ocean as used by the IPHC start at approximately 46°30'N., which is near the southern boundary of regulatory Area 2, rather than at 47°30' which was proposed by the INPFC as the southern boundary of the 'Vancouver' subarea.

All 1966 data are preliminary.
