

INPFC
DOCUMENT

Ser. No. 1607

ALLOCATION OF U.S.S.R. AND SOUTH KOREAN
TRAWL CATCHES IN 1971 AND 1972 RESPECTIVELY
BY INPFC STATISTICAL AREAS AND MONTH

Submitted to
the
COMMITTEE ON BIOLOGY AND RESEARCH
by the
U.S. SECTION
of the
INTERNATIONAL NORTH PACIFIC FISHERIES COMMISSION

U.S. National Marine Fisheries Service
Northwest Fisheries Center
2725 Montlake Boulevard East
Seattle, Washington 98112

September 1973

Japan, Canada and the United States submit detailed fishery statistics annually to the International North Pacific Fisheries Commission (INPFC).

Soviet statistics are available, but only by large geographical areas and by calendar quarters. South Korean fishery statistics are not available and catches are estimated on the basis of U.S. surveillance observations.

In this report, Soviet and South Korean trawl catches in the eastern Bering Sea and northeastern Pacific Ocean are allocated to INPFC statistical areas, by month, so they might conform more closely with data submitted to INPFC by member nations. Allocation is achieved utilizing U.S. surveillance information in accordance with procedure described in INPFC document 1515.

Soviet Catch Estimates (metric tons) by INPFC Areas by Month
1971
