Table 16

Scientific and English fish names
used in Polish catch statistics
for year 1983

Code	Scientific name	English name
704	Merluccius productus	Pacific whiting /previously Pacific hake/
499	Osteichthyes-Chondrichthyes	Other finfish

NOTE :

Included in the tables 6 - 15 and supplied within the section entitled "Statistical Area" numerical symbols signify the areas of the catch according to the geographical coefficients

E.g. the symbol

4800 - 4830 / 125 - 126

to be found in the table 6 would mean that the catch totalling in all 2906,20 metric tons and the fishing effort of 346 hours fished should be localized within the statistical area enclosed between

48°00' - 48°30' N latitude

125°00' - 126°00' W longitude
