Fisheries Agency of Japan

The Number of Dall's Porpoise Incidentally Taken
by the Japanese Squid Driftnet Fishery in 1984

- 1 The number of Dall's porpoise incidentally taken by the Japanese squid driftnet fishery in 1984 was reported to be 2389 individuals (see attached figure).
- 2 The Fisheries Agency instructed fishermen to report an incidentally taken porpoise as a Dall's porpoise in case where fishermen could not surely identify it as Dall's porpoise. Therefore, it is quite possible that the number of Dall's porpoise here is over reported. The validity of these data should be further improved.
