CANADIAN PROPOSAL CONCERNING THE INTERIM WORKPLAN FOR THE
COMMITTEE ON SCIENTIFIC RESEARCH AND STATISTICS
COMMITTEE OF NPAFC

The following workplan is proposed for 1993:

- Report on salmon catches, escapement and artificial production in 1992;
- Review and summary of salmon research and results in 1992 beyond 200-mile limits;
- Review and summary of salmon-related research cruises beyond 200-mile limits in 1993;
- Exchange of biological samples as necessary;
- Review and summary of research plans relating to high seas salmon research for 1994;
- Proposals for data exchanges;
- Consideration of a report to the Commission.

Given the ongoing discussions of the relative responsibilities of NPAFC and PICES, it is expected that Scientists will take the opportunity at the CSRS meeting, if alternate arrangements have not been made in advance, to review the annual stock assessment documents for species other than salmon in the coastal waters off the east coast of Russia, including the Bering Sea, of the west coast of the United States including the Gulf of Alaska, and Washington, Oregon and California; and off the west coast of Canada.
