Introduction

Scientists from the National Marine Fisheries Service (NMFS), Pacific Marine Environmental Laboratory (PMEL), and the University of Alaska Fairbanks (UAF) will conduct a fisheries oceanographic survey during summer 2012 within the southeastern and central regions of the Gulf of Alaska (GOA) to provide key ecological data on the pelagic ecosystem, examine oceanographic transport mechanisms, lower trophic level production, and age-0 marine fish and juvenile salmon distribution and condition. Primary objectives of the survey will be to: 1) collect biological information on ecologically important marine fish and salmon and 2) describe the physical, and biological conditions of the GOA.

Survey

A survey of epi-pelagic fish species, zooplankton, ichthyoplankton, and oceanographic measurements will be conducted at predetermined survey stations within the southeastern and central GOA regions aboard a contracted stern ramp trawling vessel. The survey will begin 1 July 2012 in Juneau, Alaska and end on 28 August 2012 in Juneau, Alaska with a total duration of 45 sea days (Table 1).

Fish samples will be collected using a midwater rope trawl and the trawl will be towed at or near the surface for 30 minutes at speeds between 3.5 and 5 kts at each station.

All fish species will be counted and standard biological measurements including length and weight will be taken from subsamples of each species. Marine fish and juvenile salmon will be collected for food habits and laboratory analyses. Biological and physical oceanographic data will be collected at each trawl station.

Table 1. Tentative cruise itinerary for the Gulf of Alaska Project research cruise, July 1 to August 28, 2012.

Date	Location/Activity
LEG 1	
Jul 1	Embark scientific party /load gear (Juneau, AK)
July 2	Depart Juneau, AK and transit to southeastern GOA
Jul 3-8	Sample southeastern grid stations working from south to north (Fig. 1)
Jul 9	Inport Sitka, crew change, and deliver live specimens
July 10-23	Continue sampling southeastern grid stations working from south to north (Fig. 1)
July 24	Inport Juneau, AK
LEG 2	
Aug 2	Embark scientific party /load gear (Juneau, AK)
Aug 3-4	Depart Juneau, AK and transit to central GOA

Aug 5-22 Sample central GOA grid stations working from east to west (Fig. 2)
Aug 23 In port Kodiak, AK
Aug 24-27 Transit to Juneau, AK
Aug 28 Inport Juneau, AK
