Japanese research vessels (Appendix table) are scheduled to conduct seven surveys for pelagic fishes and squids in the North Pacific Ocean in 2016 (Table 1). These surveys have a possibility of incidental salmon catch during the fishing operations with driftnets or trawl net. In the case of driftnet operation, the length of driftnets will be less than 2.5 km at the sea.

**Key words:** Japanese research cruise plan, pelagic fish, squid, incidental salmon catch, North Pacific Ocean, 2016

**Table 1.** Cruise plans of Japanese research vessels involving incidental catches of anadromous fishes in the North Pacific Ocean in 2016.
