Dynamic Data Management in the Cloud

Using the GeoOptix Platform to Tame Big Data Problems

Matt Deniston and Keith Steele

Sitka Technology Group
Data puddles
Not another tractor pull!
• Easy to use
• Self-service
• Multi-program, multi-protocol support
• Secure and reliable
• Scalable
• Extensible
1. Customize and centrally control your data projects, measurements, methods, sites, measurements, and metrics

2. Collect and quality check data: quicker & cheaper

3. Integrate and automate metrics generation, model runs, & other analytical processing

4. Free up staff to work on higher-order information tasks
How does it work?
Umatilla Tribe’s Goal: retain sovereignty over their land... and their data.
Objective: Automate metrics generation
aka, skip the spreadsheet circus!
Solution
Actual Metrics
